About us?

Knowledge City Schools are one of the initiatives of Knowledge City for Education Company (LLC), aiming to provide quality education that combines international standards with pride in Saudi identity, within a stimulating, digital, and advanced learning environment. The schools adopt a modern educational model that focuses on building individuals intellectually, ethically, and skillfully, in line with the objectives of Saudi Arabia's Vision.

Knowledge City for Education Company is an innovative educational project, with a team possessing over 28 years of experience in managing and operating educational institutions.

Company Objectives:

Preserving Islamic identity and national culture

Empowering students with sources of knowledge

Keeping pace with global scientific and intellectual development

Vision

Achieving educational leadership by nurturing a distinguished generation that is knowledgeable, aware, creative, and proud of its religious values and national identity.

Mission

Continuously developing educational programs and tools according to a global Saudi educational program based on encouraging learning and empowering knowledge.

CEO's Message

Knowledge City believes that human capital is the true wealth and the cornerstone of development. Through its expertise spanning over 28 years, it strives to contribute to building a promising future for the nation's youth by investing in minds and talents and developing skills. In light of rapid scientific advancements and the multiplicity of knowledge sources, the City emphasizes the necessity of moving beyond the traditional concept of schools, transforming them into institutions for human development and the enhancement of cultural and intellectual awareness.

Knowledge City adopts an integrated educational model based on concepts of continuous improvement and efficiency measurement. This is achieved through a digital learning environment and academic, educational, and skill-based programs that keep pace with the latest strategies of "knowledge empowerment," supported by international relations and partnerships with global educational institutions to elevate the quality of educational outcomes.

Our Methodology

The Saudi National Curriculum:

For the national curriculum, we rely on offering core subjects such as Islamic Studies, Arabic Language, and Social Studies, in accordance with the Ministry of Education's curricula. We are keen to foster national identity and Islamic values, and to develop thinking and communication skills in Arabic, while providing a stimulating educational environment that integrates both in-class and extracurricular activities.

Islamic Studies

Our Methodology

Technology Curricula:

As part of our commitment to the Kingdom's vision for digital transformation, the schools offer advanced educational programs in robotics, programming, digital design, and computer skills. These programs are integrated into daily education to prepare students to understand the tools of the digital age and develop their technical competencies from early stages, thereby enhancing their readiness to excel in their academic and professional future.
